DETAILED ACTION

1. Request for drawing correction filed 14 June 2002 has been approved.
2. Applicant's Amendment filed 14 June 2002 has been reviewed and placed of record in the file.

Election/ Restriction

Applicant canceled claims 15 and 18 in response to a Restriction Requirement mailed 04 December 2001 and a Non-final Office Action mailed 14 January 2002. However, upon in-depth examination of the claims, the examiner has found that further restriction to the claims is required.

Thus, claims 1- 14 and 16-17 are pending in this application.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14, draw to a semiconductor device and method for manufacturing the semiconductor device having a claimed thickness of a gate silicon oxide layer other than the area under the gate, is classified in class 257, subclass 395 or 296+.

II. Claims 16 and 17, draw to a method for manufacturing a semiconductor device characterized in a gate sidewall structure being formed by CVD at a temperature exceeding 850°C, is classified in class 438, subclass 197+.

4. The inventions are distinct, each from the other because of the following reasons:

Each of the inventions, I and II, recites limitations not recited in any of the other invention. The differing limitations make the inventions I and II patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I and II would not, by itself, anticipate or make obvious the other invention. Therefore, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. Andrew Telesz, Jr. on 27 June 2002 in an attempt to request an oral election to the above restriction requirement, but did not result in an election being made.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2818

application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu-Tu Ho whose telephone number is (703) 305-0086. The examiner can normally be reached on 6:30 am - 5:00 pm.
